

The AutoCAD Workbench[®], Final Edition: Table of Contents

Chapter One: The User Interface

Toggle Your Window Back from Dual Screen	1
Startup Insights	1
Dock Layout Tabs Above the Status Bar	1
The Governing Body of Workspaces	2
Quick Access Toolbar [QAT]	2
Application Menu Tidbits	2
The Ribbon	3
Toolbars with the Ribbon	4
Partial Open + Partial Load	5
The Command Line	6
The Status Bar	7
Other User Interface Insights	8
Optimum Options	8
Template Fundamentals	15
Be Responsible: Think Ahead	16
Files of Importance When Upgrading	17
Got HELP? Use It!	18
'Places' For Quicker Access	18
Display Adjustments	18
'Sign Language': Cursor Badges	19
Clean Screen ... or Open a Drawing	20
Wheel Mouse Tidbits	20
Pan and Zoom Antiques	20
Navigation Bar	21
Model Space View Controls	21
Tiled Drawings and the Taskbar	22
Quick View Layout on the File Tabs	23
Need-To-Know Tech Tools	24
User Coordinate System Icon & Properties	25
Position the UCS Origin [2D]	26
Split Viewports in Model Space	27
Split the Split Viewports	28
Named Views	28

Custom View in Viewport Controls	30
Save the UCS by Name	30
Optimized Viewing of Your Drawing Info	31
Layer Properties Header Organization	32
Off vs. Freeze	32
Freeze Individual Layers with Layer Freeze	33
Layer Previous	34
Layer Isolate & Layer Lock	34
View Layers with Layer Walk	35
Create a Layer State in Layer States Manager	37
Layer State List ... or Checkerboard	38
To – or – From the Current Layer	38
Layer Translator	39
Merge Layers	40
Viewport Overrides for Layers	41
Assign a Linetype to a Layer	41
Assorted Layer Insights	42
Options for the Disappearing Drawing	43
What to do With Geometric Constraints	44
The /nologo Switch and a Shortcut Key	44
The System Variable Monitor	44
Drawing Information	45
How to Start a Metric Drawing	46

Chapter Two: Creating & Editing

The Lowly Rectangle	47
Graphic Rectangle Fit	48
Why a Closed Polyline	48
Variable Width Polylines	49
Blended Curves	49
Polar Tracking	50
Polar Tool Tip & Vector	50
User Increment Angles for Polar	50

Polar Coordinate Entry	51	Selection ‘Lasso’	74
Ortho Shift	51	Select Similar	74
Drawing in Surveyor’s Units	51	Hide & Isolate Objects	74
Snap From	52	Quick Properties vs. Properties	75
Move with a Displacement	52	Linetype Tweaks	76
Object Snap Tracking	53	LTSCALE (Lyn’ Type Scale)	76
Otrack with Direct Distance Entry	54	Measurements	77
Snap to Perpendicular	54	Find the 2D Distance Between 3D Points	78
Midpoint Between Two Points [M2P]	54	Cycle Through Stacked Objects	79
Snapang Setting	55	Draw Order	79
Hatch Creation Tab	55	SETBYLAYER	80
Hatch Applications	57	Do U, OOPS, or UNDO?	80
Download and Install Custom Hatch Patterns	59	The ‘Multiple’ Modifier	81
Gradient Hatch	60	Rotate to Parallel	82
Hatch Transparency & Hatch Order	60	Customize Ortho with Snapang	82
Variable Controlling the Hatch Boundary	61	Rotate with the Copy Option	83
Snap to Hatch Patterns	61	Extend along Odd Angles	83
Add Batt Insulation to Walls ... as a Linetyp	61	Align	83
Super (User-Defined) Hatch	62	Lengthen	84
Boundary Creation	63	Move and Copy With ‘CTRL’	85
Quick and Easy Parallel Lines with Dline	63	Copy with a Basepoint	85
Create a Door Opening with Dline	64	Paste to Original Coordinates	86
Revision Cloud	65	‘Single’ Option for Copy	86
Group Toggle Notice	66	Scale With ‘Reference’	87
The Doughnut/Donut	66	Rotate With ‘Reference’	87
Edit Polylines	67	Rotate Using Properties	88
Add a Vertex to a Polyline	67	Stretch	88
Add an Arc to a Polyline	68	Delete Duplicate Objects [Overkill]	89
Offset Corners & Options	68	Create an Associative Rectangular Array	89
Offset with the Layer Option	69	Edit a Source Object in an Array	90
Preview Feature for Fillets and Chamfers	69	Create an Array Along a Path	91
Fast Fillets on Polylines	70	Subdivide Your Linework	91
The JOIN Command	70	Trim & Extend	92
Need-To-Know Variables	71	The Old ‘Cookie Cutter Trim’: EXTRIM	93
Select the Right Stuff	73	Uses for the Wipeout Object	94
When Picking ‘Air’ isn’t Working	73	The Lost Art of Grips	95

That 'DYNMODE' Button	98
Come to Terms with Blocks	98
How to Create a Block	99
The Insert Command	100
The Block 'Ribbon Gallery'	100
Change the Insertion Point of a Block	101
Wblock [Write Block]	101
Block to .DWG with Wblock	102
Grab a Block with the Insert Osnap	102
Bcount [Block Count]	103
External Reference [XREF] Mechanics	103
Attach an Xref	104
Manage Xrefs	105
Edit the Reference Drawing	106
Xref Layer Insights	107
Xclip Update	108
Key Features of eTransmit	109
Reference Manager to Update Xref Paths	110
Dynamic Blocks: An Introduction	111
Dynamic Blocks: Visibility Parameters	111
Add Another Block as a Visibility Parameter	112
Dynamic Blocks: Alignment Parameters	113
Dynamic Blocks: Two-Directional Stretch	114
Dynamic Blocks: Add a Rotation Parameter	115
Use the Block Editor to Redefine Blocks	116
Considerations Regarding Blocks	116
DesignCenter Review	116
Autodesk Seek	118
Attach and Snap to PDF Underlay	118
.PDF Drivers and Layer Visibility	120
.PDF Import	120
EXPRESS Tools: MoCoRo	123
EXPRESS Tools: Break-Line Symbol	123
EXPRESS Tools: Replace Block	124
EXPRESS Tools: System Variables Editor	125
Purge	125
Drawing Alerts	125

Chapter Three: Annotation & Dimensioning

Raster Image Mechanics	129
Raster Image Cropping	130
Raster Image Display	131
For an Image That's Path-Free – OLE!	131
Create a Text Style	132
Text Justification	133
Text Editor Settings	134
Special Text Characters	134
Single-Line Text Strikethrough Character	134
Highlight Color for Text Objects	135
Text Frame on Mtext	135
Hexadecimal Code in Single-Line Text	135
Snap to Text	136
Select Objects with Width	136
Disabling Annotative Text	136
Multiline Text	137
Multiple Columns in Mtext	138
Mtext Line Spacing Factor	140
Word® Text Into Multiline Text	140
The Text Align Command	140
EXPRESS Tools: Convert Text to Mtext	141
EXPRESS Tools: Orient Text with TORIENT	142
EXPRESS Tools: Change Text Case [Tcase]	142
Stacking Fractions in Mtext	142
Quick Select with a Wildcard for Text	143
Quick Leader [Qleader]	143
Multileader	144
EXPRESS Tools: Text Mask	146
EXPRESS Tools: Enclose Text in Object	146
EXPRESS Tools: Arc-Aligned Text	147
Qtext for Mystery Dots	148
Find Annotation in the Drawing	149
BROWSER Command	150
Attribute Fundamentals	150
Edit Block Geometry 'In-Place'	153
Add a Multiline Attribute to an Existing Block	153

Edit Existing Attribute Definitions	155	Dimension Overall Scale	179
Edit the Attribute Definition Order	155	Dimension Text Height	180
The Block Attribute Manager [BATTMAN]	155	Associative Dimension Editing	180
Global Attribute Edit [GATTE]	156	Dimension Model Objects in Paper Space	181
Use Find and Replace for Attribute Editing	157		
Edit and Attribute Sans Editor	158	Chapter Four: Plotting & Layouts	
EXPRESS Tools: Explode Attributes with Burst	158	Convert Plot Styles	183
Extract Attribute Data	159	Layout Fundamentals	184
Create a Table Style	160	Viewports in a Layout	185
Insert and Edit a Table	161	Maximum Active Viewports	187
Tables and Excel® Files	163	Maximize Viewports	187
Coordinates from Excel into AutoCAD	164	Layout Tab Tidbits	187
Field Fundamentals	165	Viewports Dialog Box [Layout Tab]	188
Create a User-Defined Format for a Field	166	Estimating Plot Scale	188
Display Area Values with a Field	166	Rotate a Viewport	189
Drawing Properties in a Field	167	Irregular Shaped Viewports	189
Plot Scale in a Field	168	Transparent Layers in a Viewport	190
The 'CTAB' System Variable in a Field	168	Layer Transparency in Model Space	191
Create a Dimension Style	169	Lock a Viewport Display	191
Avoid Using 'Standard' in Text & Dim Styles	172	Copy and 'Peel' a Viewport	192
The DIM Command	172	Viewport Alignment with MVSETUP	192
Restore the Original Dimension Value	173	UCSFOLLOW and Viewports	193
Add Linear and Aligned Dimensions	173	Layouts from DesignCenter	193
Dimension Continue	174	Change Space	194
Angular Dimensions	174	Paper Space Linetype Scale	194
Dimension Grips	175	Create a Plot Style Table	194
Display Metric with Imperial Dimensions	175	RGB Color with Monochrome Plot Style	196
Dimension with Inches Only	176	Publish [Batch Plot]	196
Dimension with Text Only	176	Write and Read a .DWF	198
Dual Dimensions in a Dimension Style	177	Sheet Set Fundamentals	200
Add Text to a Dimension	177	Plot a Drawing to .PDF	201
Arc Dimensions	178	Plotting from Model Space	202
Move Dimension Text with Leader	178	Solution to Fat .PDF Lines	203
Dimension Box and Background	178		
Aligned vs. Rotated Dimensions	179		
Background Mask on Dimension Text	179		

Chapter Five: Customizing AutoCAD

Customize User Interface [CUI]: An Intro	205	Palette Button: Revcloud from an Object	234
Customize the Quick Access Toolbar [QAT]	206	Palette Button: Automate the UCS Position	235
QAT Button: Create New Layer	207	Palette Button: Pushbutton Mtext	236
QAT Button: Duplicate for Edit Attributes	208	Palette Button: Dimensions	237
QAT Button: Favorite Osnaps	208	Palette Button: Plot Stamp Using a Field	237
QAT Button: Set a Standard Viewpoint	209	Palette Button: Blank Button	238
QAT Button: Reload all Xrefs	210	Palette Button: Linetypes in a Viewport	238
QAT Button: Load Linetypes	210	Palette Button: Double-Line	239
QAT Button: Drop-down Menu	211	Palette Button: Add an Image to a Button	240
QAT Button: Add Select Similar to the List	212	Palette Button: Node Snap	240
QAT Button: Zoom / .9X	212	Palette Button: M2P	241
QAT Button: Consistent Viewport Scale	213	Palette Button: Enclose Text in Object	241
Assign a Quick Access Toolbar to a Workspace	214	Palette Button: Favorite Settings	242
Transferring Your Quick Access Toolbar	215	Palette Button: Layout Tabs with Title Blocks	243
Float a Panel from the Ribbon	216	Lock a Tool Palette	244
Add a New Tab and a Panel to the Ribbon	216	Export a Tool Palette	245
Add Another Row to Your Panel	217	Change the Block Source File Globally	246
Copy a Default Panel to Your Custom Tab	218	Toggle Background Mask in Quick Properties	246
Add Rename to a Panel's Dialog Box Launcher	219	Find the Hatch Area in Quick Properties	247
Put the Firecracker Back on Explode!	219	Edit Rollover Tooltips	247
Add Another Dimension to the Dropdown	220	Change Ctrl + F to Find	248
Display Toolbars with the Ribbon	221	Change the F1 Key Assignment	248
Edit the Command Aliases	221	Add an Object Snap to a Function Key	249
Michael's Favorite Aliases	222	Add MIRROR to Your Right-Click Menu	249
Add a Contextual Tab State for a Dimension	223	Edit the Plot Scales List for a Viewport	250
Export Your Custom Ribbon Using Transfer	224	Hyperlink Insights	250
Introduction to Tool Palettes	226	Use RENAME For Named Objects	251
Palette Groups	227	Trusted Locations	252
Importance of the Palette Block Source File	228	Autodesk Exchange Apps / Apps Store	252
Blocks from DesignCenter on a Tool Palette	229	Repeat a Command in a Macro	253
Tool Properties for Blocks on a Palette	230	Lazy Lisp Fundamentals	253
Update Block Source Edits in the Drawing	231	Use the Startup Suite to Launch Lisp Routines	255
Palette Button: 'Pick Points' Hatch	232	More Lisp Routine Ideas	255
Palette Button: 'Select Objects' Hatch	232	Macro to Switch from Model to Paper Space	257
Palette Button: Rectangular Revision Cloud	233	Running a Script with One Click	258
		What's Best for Customizing?	259

Chapter Six: 3D Stuff

3D-Specific Tabs & Panels	261
3D Views & Viewport Controls	261
The Orbits	262
The View Cube	263
The User Coordinate System [UCS] in 3D	264
UCS [User Coordinate System] Icon Properties	265
Region	266
Using Presspull to Create 3D from 2D	267
Dynamic UCS [DUCS]	268
3D Editing Gizmos	269
Isolines or Facetres?	270
Sweeping a Shape Around a Polyline	270
Apply a Chamfer to a 3D Solid	271
Subtract + Union	272
Surface Modeling Fundamentals	272
Create 3D Surface Objects	272
Create Curved Surfaces	273
Visual Style Review	274
The Visual Style Panel & Gallery	275
Create a Style with the Visual Style Manager	276
Visual Style Properties	277
Visual Style Application	279
3D Clip and a Named View	279
Apply Materials to Surfaces and Solids	281
Importing Materials	282
Loading Materials	282
Lights and Shadows	284
Add Dimensions to a 3D Object & Add Text	285
Viewports Dialog Box [Layout Tab]	286
Using Shell and Slice to Create Hollow Forms	286
Using Loft to Create Curved Surfaces	287

Appendix A: AutoCAD File Extensions	289
Appendix B: Control & Function Keys	290
Appendix C: Instructions for Downloads	291
Appendix D: Left Field Compilation	295
Index	296
