

Each furniture extension in CET Commercial Interiors is unique ... but we all have to cook in the same CET ‘Kitchen’.

When learning CET Designer, understanding the subtleties within each extension comes with its own learning curve, (not unlike cooking). But once you have your stations, private offices, and conference rooms laid out, it’s all about presentation ... and the work begins.

Below is a menu of over 50 topics everyone encounters sooner or later, whether you’re doing Live Design, preparing Install drawings, or simply a Presentation for the team. And although not a complete list, if you’ve mastered these, you’re well on your way to ‘CET Champion Chef’ status.

So, pass this around to your CET crew, check the topics you’d like to dig into (or add your own!), then send it back to me and we’ll fire up the grill!

“Michael was wonderful. His organization of support documents; how he organized the flow of subjects was extremely helpful in understanding CET better. Also, giving us shortcuts was HUGE! That is going to make designing so much easier.”

- ♦ Training is Extension-specific (unfortunately, Steelcase cannot be covered at this time; sorry)
- ♦ Cost: \$225/hour for groups up to 10 [I don’t charge per person]. Total cost based upon content requested; are we doing a picnic or a banquet?
- ♦ My Level I training contains all the above content with the exception of Movie Studio which is a separate Workshop.

Email me at michael.beall@cadtrainerguy.com or call me at 502.500.2267 and we can put together a CET Productivity Plan for your team!
